

# NEVER NOTICE

## WAVE SLEEP WAVE

**Wave Sleep Wave** are a duo who sound like a gang—**Jerry Adler** creating harmonically and sonically breathtaking tapestries of guitar sound, punctuated with the urgent, stabbing delivery of first-rate lyrics; and **Yuval Lion** expertly pouring the rhythmic foundation on which this music stands. It is at once highly conceptual and deeply compelling. Most elements of traditional song structure have been dispensed with in favor of something akin to a snowball rolling down a mountain—gaining weight with each revolution, changing with each inch of diameter added, faithful to its former self while becoming ever and ever more. The music is a constant blending of opposites—arresting beauty mixed with harrowing noise, intricate composition underpinning free improvisation, the major and minor, the consonant and dissonant, the organic and technological, all in coexistence not just on the same album but in almost every moment. For those interested in anything mentioned above, **Wave Sleep Wave** is a band worth knowing.

“The new album by Wave Sleep Wave is simply R-A-D. If you get one album any time soon, this should be it.”

—*Loudvine*

“Wave Sleep Wave is an expansive, grinding, haunting album, sounding as much like a Spaghetti Western soundtrack as a dingy basement show.”

—*Pop Matters*
